

# Industrial Wall Tubing

*Extruded Tubing - ETFE, FEP, PFA, PTFE*

*Similar to our Heavy Wall tubing, fractional sized Industrial Wall tubing provides added strength and protection against abrasion.*

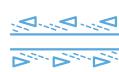

## Overview

This thick-walled fractional sized tubing is designed for applications needing higher burst pressure while also providing additional physical protection from abrasion. This fluoropolymer tubing is highly chemically resistant and presents a great option for air handling and transport as well as chemical and analytical applications.

Industrial Wall tubing is available in colors for identification and can be cut to length or spooled for longer lengths. Zeus Industrial Wall tubing is available in ETFE, FEP, PFA, PTFE, and more, but other resins may be available upon request.

CHEMICAL RESISTANCE

COEFFICIENT OF FRICTION

CONTINUOUS SERVICE TEMP

## Applications

- Fluid management
- Laboratory, analytical tubing
- Industrial tubing
- Medical instruments

## Capabilities and Sizing

- Available in PTFE, FEP, PFA, and ETFE,
- Other resins may be available upon request
- Wall thicknesses available from 0.015" (0.38 mm) to 0.050" (1.27 mm)
- ID sizes available from 1/32" (0.79 mm) to 1 1/2" (38.10 mm)

## Key Properties

- Strength
- Higher burst pressure
- Increased wall thickness
- Abrasion resistant
- Chemically resistant
- High continuous service temperature

DOD Technologies
